SPECIAL VOLUME

TECTONIC, METAMORPHIC AND ISOTOPIC EVOLUTION OF DEEP CRUSTAL ROCKS, WITH SPECIAL EMPHASIS ON SRI LANKA

Edited by

M. RAITH and S. HOERNES

Mineralogisch–Petrologisches Institut, Universität Bonn, Poppelsdorfer Schloß, D-53115 Bonn, Germany

CONTENTS

Preface 1
The Precambrian of Sri Lanka: a historical review
P.G. Cooray 3

I. Tectonic evolution
Origin of compositional layering and mechanism of crustal thickening in the high-grade gneiss terrain of Sri Lanka
A. Kröner, K.V.W. Kehelpannala and L.M. Kriegsman 21
Large-scale thrusting in the lower crustal basement of Sri Lanka
R. Kleinschrodt 39
Evidence for a fold nappe in the high-grade basement of central Sri Lanka: terrane assembly in the Pan-African lower crust?
L.M. Kriegsman 59
Gravity, magnetic and structural patterns at the deep-crustal plate boundary zone between West- and East-Gondwana in Sri Lanka
G. Büchel 77

II. Isotopic evolution
Nd isotopic mapping of the Sri Lanka basement: update, and additional constraints from Sr isotopes
C.C. Milisenda, T.C. Liew, A.W. Hofmann and H. Köhler 95
Pb isotopic discrimination of crustal domains within the high-grade basement of Sri Lanka
T.C. Liew, C.C. Milisenda and A.W. Hofmann 111
U–Pb geochronology of the Sri Lankan basement
S. Hölzl, A.W. Hofmann, W. Todt and H. Köhler 123
Pb-loss patterns in zircons from a high-grade metamorphic terrain as revealed by different dating methods: U–Pb and Pb–Pb ages for igneous and metamorphic zircons from northern Sri Lanka
A. Kröner, P. Jaeckel and I.S. Williams 151
The role of fluids in granulite-facies metamorphism as deduced from oxygen and carbon isotopic compositions
S. Hoernes, E. Fiorentini and R. Hoffbauer 183
Oxygen isotope thermometry based on a refined increment method and its application to granulite-grade rocks from Sri Lanka
R. Hoffbauer, S. Hoernes and E. Fiorentini 199
Geochemistry of pelitic and psammopelitic Precambrian metasediments from southwestern Sri Lanka: implications for two contrasting source-terrains and tectonic settings

III. Metamorphic evolution
Metapelites:
W.K.B.N. Prame and J. Pohl 223
Evidence for prograde metamorphic evolution of Sri Lankan pelitic granulites, and implications for the development of continental crust
Y. Hiroi, Y. Ogo and K. Namba 245
Petrology of granulite-facies metapelites of the Highland Complex, Sri Lanka: implications for the metamorphic zonation and the *P–T* path
P. Raase and V. Schenk 265

Charnockites and basic granulites:
Summary and discussion of *P–T* estimates from garnet–pyroxene–plagioclase–quartz-bearing granulite-facies rocks from Sri Lanka
R. Schumacher and S. Faulhaber 295

Calc-silicate rocks:
Reactions and textures in wollastonite–scapolite granulites and their significance for pressure–temperature–fluid histories of high-grade terranes
S.L. Harley, I.C.W. Fitzsimons and I.S. Buick 309
Petrologic phase equilibria and stable isotope fractionations of carbonate–silicate parageneses from granulite-grade rocks of Sri Lanka
R. Hoffbauer and B. Spiering 325

Feldspars:
Revised two-feldspar geothermometry applied to Sri Lankan feldspars
G. Voll, C. Evangelakakis and H. Kroll 351

Incipient charnockites:
A tectonic perspective of incipient charnockites in East Gondwana
M. Yoshida and M. Santosh 379
The structural setting of the Chilka Lake granulite–migmatite–anorthosite suite with emphasis on the time relation of charnockites
S. Bhattacharya, S.K. Sen and A. Acharyya 393
